February 15 1984

Hello there!

The Central Coast has bitten off more than the guys in and around San Luis Obispo first thought, so I am writing in an effort to locate interested lecturers for the twenty ninth annual UHF/VHF conference.

We are committed and we are going to have the conference in Paso Robles on the evening of the forth, the fifth and Sunday the sixth of May. The location will be the Paso Robles Inn in the center of the City.

Although this letter might be zeroxed I do hope you will consider my request for you becoming a contributor seriously. There is a problem getting back to me other than in the mail in that I teach night school two nights a week---Tuesday and Wednesday nights---and work for the State in which it is difficult to talk during working hours. The better times are between 6:30 and 7:30 in the morning in which direct dialling is the cheapest. The number is in the upper right hand part of this notice. If you need the work number, it is: (805) 549 3366. You might get a telephone recorder or a grouchey boss!

The conference usually picks up the tab for the banque t but in true ham style, the more expensive lodging is not provided. The room rates are quoted at between $28 and $35, considerably cheaper than in the past! The rooms for lectures are spacious and centrally located. I will see that audio visual aids are provided if you let me know your needs. If you need help in handouts it would be most convient if you would see to it that they are printed beforehand as I have no idea how to print them on the spot. Fifty copies should be enough for those present.

I will do the introduction of each lecture and I will need to know your beginning and present background BUT I want to be sure to start with your practical ham experience and end with University experience! The conference is trying to be as practical as possible but in no way slighting true technical competence. Please let me know as soon as you can if you can help or if your feel someone else would care to serve.
